CPB176Mi31 100µg

KLH Conjugated Enkephalin (ENK)

Organism Species: Homo sapiens (Human)

Mus musculus (Mouse)

Rattus norvegicus (Rat)

Bos taurus; Bovine (Cattle)

Cavia (Guinea pig)

Sus scrofa; Porcine (Pig)

Canis familiaris; Canine (Dog)

Ovis aries; Ovine (Sheep)

Chicken (Gallus)

Oryctolagus cuniculus (Rabbit)

Equus caballus; Equine (Horse)

Instruction manual

FOR IN VITRO USE AND RESEARCH USE ONLY NOT FOR USE IN CLINICAL DIAGNOSTIC PROCEDURES

12th Edition (Revised in Aug, 2016)

[PROPERTIES]

Source: Protein Conjugation

Original Peptide Residues: Tyr100-Met104

Purity: >90%

Traits: Freeze-dried powder.

Buffer formulation: PBS, pH7.4.

Applications: Immunogen; Coating Antigen; Blocking Peptide; ELISA.

Note: 100% cross-reactivity of ENK was observed among human, mouse, rat,

bovine, cavia, porcine, canine, ovine, gallus, rabbit and equine.

[USAGE]

Reconstitute in PBS (pH7.4) to a concentration of 0.1-1.0 mg/mL. Do not vortex.

[STORAGE AND STABILITY]

Storage: Avoid repeated freeze/thaw cycles.

Store at 2-8°C for one month.

Aliquot and store at -80°C for 12 months.

Stability Test: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
